

inFusion eForms accelerates the ROI of your automated forms-based processes.

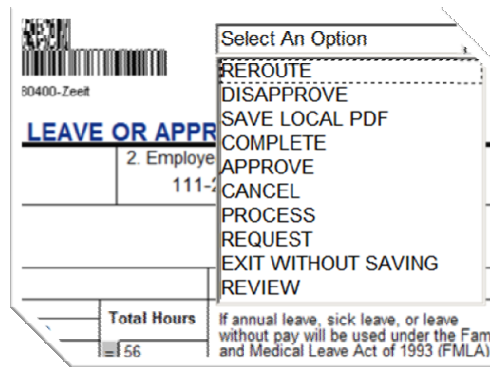

Lower the Cost of Running Business

eForms is not just about being green. It also eliminates the cost of forms printing, distribution, and storage. Through your new automated forms-driven processes, inFusion eForms helps your organization improve business productivity and customer responsiveness.

Manage Governance, Risk and Compliance

inFusion eForms helps your organization monitor and enforce integrity- and regulation-driven policies and processes, providing the transparency you need to sustain your governance and compliance strategy.

inFusion eForms also integrates with market-leading brand protection and authentication technologies to deliver ink signature, authenticity verification, and fraud prevention that will effectively help your organization manage risk associated with content authenticity and security when documents are printed to paper.

inFusion eForms™ is a standards-based J2EE electronic forms environment for completing, routing, approving, and processing all of your forms. Offering enterprise-class performance and award-winning features, inFusion eForms has proven to deliver immediate operational impact without needing programmers.

Unlike other workflow solutions, inFusion eForms' sophisticated design eliminates the need of an IT organization to maintain it. In fact, inFusion eForms' "Workflow by Point and Click" enables the line of business users to finally take the lead in running and managing their forms. Ask us about our eForms implementation for 18000 users that's backed by only a 1-person help desk.

Often referred to as the **Lotus® Forms Accelerator**, if your organization uses Lotus Forms, inFusion eForms ensures your will be up and running robust electronic forms with secure multi-step workflow in a matter of weeks, not months or years.

Since 1999, inFusion eForms has helped dozens of organizations streamline business operations and eliminate counterproductive paper forms to achieve impressive ROI, particularly in Health Care, Insurance, Life Sciences, Government, Marketing, Human Resources, Non-profit and Financial

- **Point and Click** — Set up and manage forms workflow without programming. Effortlessly fill, submit, route, review and process pixel-compliant forms in your browser. Instantly customize granular field controls with point and click.
- **Enforceable Audit Trail** — Record every step of your form transactions for track-and-trace and compliance purposes.
- **Format Independence** — Protect current and future technology investment through support of legacy PDF and XML-based Lotus Forms.
- **Rapid Deployment** — Enable employees, business partners and customers to be more productive and efficient in weeks, not months.
- **Rich Client** — Continue to work on the forms and applications while offline. inFusion eForms will synchronize your work when you reconnect to the system.
- **Bar Code** — Printing your forms to paper may be inevitable. inFusion eForms' bar code integration gives your printed forms secure end-to-end data delivery with trust and validity. Encode information into a Data Matrix which also prints on the form. When scanned, the bar code authenticates and populates data in the system.
- **Covert Data** — Embed covert data/ image in your printed form to reliably verify authenticity and prevent potential fraud and counterfeit. The embedded data is only revealed when examined with a lens decoder.

* Lotus Forms 3.0 and supporting IBM platforms must be purchased separately.

LOTUS CTO INNOVATION AWARD 2007

"ITM's inFusion system gives customers and solution providers an innovative rapid deployment system for business applications based on forms."

Doug Wilson, Lotus Chief Technology Officer

LOTUS ADVISOR® AWARD

inFusion eForms was chosen as the 2007 Editors' Choice for Workflow Solutions. The judges were impressed by the "point and click" design that allows business users to take full control of their forms without writing a single line of code.

BTI

ITM is a subsidiary of International Barcode Corporation (d/b/a "BTI"). BTI is an innovator in advanced brand protection and counterfeiting prevention technologies backed by dozens of issued and pending patents. BTI and its affiliate companies have offices in New York, Philadelphia, and Washington, DC, with a joint venture in Beijing, China. BTI is represented by a growing network of international licensees and over 150000 customers.

inFusion eForms System Requirements

- IBM Lotus Domino® 6.5 and higher
512MB available RAM
32MB available hard drive space
- IBM Websphere® Application Server 5.5 and higher or Websphere 6.0.2.9 and higher or Websphere Portal 6.0.1 and higher
32MB available RAM
64MB available hard drive space
- Deploying XML forms needs Lotus Forms 3.0 and higher or IBM Workplace Forms™ 2.7.
